

Municipality of Anchorage Project Management & Engineering

Duben Avenue Upgrade PM&E Project #12-33

Project Newsletter- June 5, 2017

Construction Update

Project Summary

The Municipality of Anchorage (MOA), Project Management & Engineering Department (PM&E) is preparing to begin construction on the Duben Avenue Upgrade from Patterson Street to Muldoon Road. Professional & Technical Services, Inc. (PTS) has been hired by MOA to assist with the management of this project. Improvements will include curb and gutter, pedestrian facilities on both sides of the street, piped storm drain, and street lighting. Significant changes to the road grades will require several retaining walls to be constructed and water, natural gas, electric, telephone and cable utilities will be relocated, as well. The project has been funded by a combination of State grants and 2017 Municipal bonds. All funding is in place to complete construction.

Project Details and Schedule

PM&E has selected Pruhs Construction Company, LLC, to perform the construction of this project through the public bidding process. Construction is expected to begin on or about June 19th, 2017 and end in late October 2017. Both vehicular and pedestrian traffic along Duben Avenue will be impacted throughout the project. Delays will be kept to a minimum, but drivers and pedestrians should anticipate detours and other temporary adjustments to the traffic pattern. Please obey all traffic control signage and personnel and if you have questions, please don't hesitate to contact a member of the project team listed here. The MOA appreciates your patience and cooperation during construction.
