

Duben Avenue Upgrade Patterson Street to Bolin Street

MOA Project Nos. 12-32 & 12-33

February 2017

FACT SHEET

Project Description

The Municipality of Anchorage (MOA) is planning to upgrade Duben Avenue to improve vehicular and pedestrian safety in the neighborhood. The corridor has been divided into two separate projects:

- Duben Avenue West (Patterson Street to Muldoon Road)
- Duben Avenue East (Muldoon Road to Bolin Street)

Project Goals

The goals of the Duben Avenue projects are to:

1. Upgrade Duben Avenue to current MOA standards
2. Provide pedestrian and/or bicycle facilities to improve connectivity and user safety
3. Balance the impacts to local access, businesses and adjacent properties

The planned upgrades include better drainage, improved sight distances at intersections and at steep hills, sidewalks and curb ramps, and improved street lighting for better visibility. The project will also include improvements to the Muldoon/ Duben intersection as part of the Duben Avenue East project. Intersection improvements will include replacing the traffic signals, illumination upgrades, and replacement of the curb.

Current Project Status

In January 2014, a Draft Design Study Report was made available to the public via the project website (www.DubenAvenue.com). The Duben Avenue West project is currently in the 95% design phase and is tentatively scheduled for construction in 2017 pending funding. The Duben Avenue East project is currently in the 65% design phase and no construction will occur in 2017. No schedule is available at this time for Duben East construction.

Project Funding Status

Each project (Duben East and Duben West) received a 2012 State grant for \$3 million dollars. The projects are fully funded through final design. Construction funding for the Duben West project is currently included in the 2017 MOA bond package.

Public comment and input will be accepted throughout the design process. Please let us know if you want to receive additional information about the project.
